Academic Awards

2010 Awarded the *ERSA 50th Anniversary Award* for outstanding scholarship at the European Regional Science Association Congress, Jönköping, Sweden. The European Regional Science Association ERSA has over 3500 members.

2002 awarded the *Hewings Award* for outstanding scholarship by the North American Regional Science Association, an academic body of over one thousand members. The award is given to a scholar under the age of forty-five, who is within a decade of completion of a PhD, for a sustained period of outstanding scholarship. Out of the twelve previous winners, Philip was the first person from outside of North America to win this prestigious award, and this reflects the analytical contributions he has made to the field of urban and regional economics.

The 2002 award citation reads; “*Philip McCann is currently Reader in Regional Economics at the University of Reading UK. Over the last nine years, he has created a sterling publication record that includes four books (two of which are being translated into other languages) and over 20 papers that have been published in the best journals in the field. His work reveals the commitment of a scholar who is able to move from theory to application with ease, bringing new developments to theory and new insights into the structure of the spatial economy. For these reasons, the North American Regional Science Council is pleased to award the 2002 Geoffrey J.D. Hewings Award to Dr. Philip McCann.*”

2007 awarded the 2006 *Moss Madden Memorial Medal* by the British and Irish Section of the Regional Science Association for the most outstanding published paper in a regional science topic in 2006. The medal was jointly awarded with Alessandra Faggian for the paper “Human Capital Flows and Regional Knowledge Assets: A Simultaneous Equation Approach”, 2006, *Oxford Economic Papers*, 58.3, 475-500

Ranked as a **Grade A** Researcher in the 2006 New Zealand PBRF Research Assessment Exercise. Only 6.9% of researchers were awarded Grade A researcher status.

2008 received the *Dean's Award for Research Excellence* from University of Waikato Management School for outstanding research performance 2005-2008.

2008 Elected as an *Academician* of the United Kingdom *Academy of Social Sciences*

Citations

According to *Google Scholar* and *Harzing's Publish or Perish* as of 19th June 2010, I had **2572** citations with an *H-index* score of 23.

According to the *Social Science Citation Index (ISI Web of Knowledge)*, which refers only to citations of my ISI-listed journal articles in other ISI-listed journal articles, as of 30th August 2010, I had been cited **604** times with an *H-index* score of 13.

A cited ISI reference search of all citations in ISI-listed journal articles to my work, including my books, book chapters and non-ISI journal articles, as of 30th August 2010 shows **776** citations.

According to *Scopus* (Elsevier), as of 30th August 2010 my journal articles had been cited **771** times by other journal articles with an *H-index* score of 15.

Book Translations and Reviews

The English language version of my textbook *Urban and Regional Economics*, 2001, Oxford University Press, is currently being used in over twenty countries, and is globally the best selling book in the field. It has been translated, or is currently being translated, into Greek, Korean, Japanese and Chinese. In addition, two of my other books have also been translated into Japanese.

My books have all received very strong reviews in the academic literature.

The review of my 1998 monograph *The Economics of Industrial Location: A Logistics-Costs Approach* in the *TESG Journal of Economic and Social Geography* (2000) reads “This is an important book which opens new perspectives on the analysis of location. The author demonstrates a high level of competence in dealing with rather complex micro-economic analyses. The major strength of the book concerns the theoretical aspects, and it is clear that McCann has really contributed to deeper insights in this respect”.

The prologue by Noboru Sakashita to the 2002 Japanese translation of my 1998 book *The Economics of Industrial Location: A Logistics-Costs Approach* reads that this is a “technically very difficult, but wonderful book”.

The review of my 2001 monograph *Urban and Regional Economics* in *Papers in Regional Science* (2003) reads “The text is very successful in achieving its stated goals, namely providing an introductory text for third or fourth year undergraduates or first year graduate students. The book is well written and accessible to more than just the intended audience.”

The review of my edited book *Industrial Location Economics* in the *Journal of Economic Geography* (2003) reads “This is a valuable book which offers much insight”.

The review of my edited book *Industrial Location Economics* in the *Journal of Regional Science* (2004) reads “Overall, this volume is quite valuable on two fronts. It provides excellent surveys of the old, as well as the new, economic geography. It also provides insights into the newest methods, the newest questions, and some of the newest results, available from a growing number of economic geographers”.
